

Name: _____

Total Marks: 80

Subject: Science

Time: 2 hours

Choose the correct answers:

/15

1. Which of the following is a property of liquid?
a. Fixed shape b. easy to compress c. does not flow d. volume does not change
2. What color does sodium produce when heated?
a. Purple b. greenish-brown c. golden yellow d. silvery white
3. _____ is made from one atom only.
a. Element b. Substance c. Compound d. Mixture
4. The sound goes _____ as vibrating length increase.
a. Higher b. lower c. Shrill d. None of these
5. Where does the chemical breakdown of food begin?
a. Stomach b. Intestines c. Liver d. Mouth
6. A human can make up to _____ litres of saliva in 24 hours.
a. 2.5 b.1.5 c. 25 d.15
7. The faeces are stored in :
a. Anus b. Rectum c. Small Intestine d. Stomach
8. _____ is a way of propagation.
a. Cuttings b. Grafting c. None of these d. Both a and b
9. Where are female gamete produced in a flowering plant?
a. Anther b. Ovule c. Stigma d. None of these
10. The body of amoeba is made from:
a. One organ b. one tissue c. One cell d. None of these
11. The word reproduction means:
a. Breathing b. Excreting c. Recycling d. Making a copy of something
12. There are _____ types of reproduction.
a. 1 b. 2 c. 3 d. 4
13. Particles of solid are held in a _____ structure.
a. Two dimensional b. Three dimensional c. Both a and b d. None
14. The word Kinetic come from a Greek word meaning:
a. Rest b. Sound c. Motion d. None of these
15. Light is the _____ energy we can detect with our eyes.
a. Waves b. electric c. electromagnetic d. None

4. Write a description of particle arrangement in gas? /2

5. Why can sound not travel in space? /1

6. Name two elements that join together to form water. /2

7. A periodic table shows all elements according to their size. /5
a. Name **three** elements that are gases. /3

b. How did the periodic table gets its name? /2

8. Alloys are mixture of two or more metals. /5
a. Explain why the alloy is harder than pure metal. /3

b. Draw the arrangement of particles when a sound metal is added to make an alloy./2

9. Carbon dioxide is a compound formed from one atom of carbon and two atoms of oxygen./5
a. How would you make a model of this? Draw. /2

b. What are the strengths and limitations of your model /3

10. A rock is stationary at the top of the mountain. /2

a. What stored energy is in its body? _____

Due to some external force the rock fall down the mountain.

b. At the top of its fall, what extra stored energy does it process? _____

11. State two energy changes when a firework explodes? /2

12. Kinetic energy is a type of energy /2

a. What is kinetic energy? /1

b. How do you know if something has kinetic energy? /1

13. Sound travel as vibrations and sound waves /3

a. What is a vibration? /1

b. Why do you think the movement of sound is described as sound wave? /2

-
-
14. Ali stands just 17m away from a high wall and claps his hand. He hears two sound. /2
- a. What is the second sound? _____ /1
- b. The ear could hear two separate sound only when the are more than a
_____ apart /1

15. In a thunderstorm /2

- a. What is the source of the sound of thunder? /1
-

- b. Where is the thunder reflected to make a roll of thunder? /1
-

16. Sara stretched 5 Elastic band. Here is what she found: /4

Elastic band	Stretched till before braking
A	2cm
B	5cm
C	3cm
D	4.5cm
E	7cm

- a. Draw a graph. /3

- b. Which Elastic band survived the longest? _____ /1

17. Air is made of particles. /4

- a. Draw how particles move when there is no sound /2

b. Draw how particles move when a vibrating object pushes on them. /2

18. What color does these elements produce when heated? Match. /5

Column A	Column B
Aluminum	green
Magnesium	Violet red
Rubidium	White
Copper	Orange
Calcium	Silvery white

19. There are four kinds of teeth. /2

a. Name four kind of teeth and their uses /2

Teeth	Use

20. Label the diagram: /7
